SELF-AUTHENTICATING RECORD OF REGULARLY CONDUCTED ACTIVITY — FED. R. EVID. 902(13)

AUDIT REF: 34cd856e-4e86-41...

LEGAL CERTIFICATE OF AFFIRMATIVE SAFE HARBOR COMPLIANCE:
This dossier compiles contemporaneous, tamper-proof electronic compliance determinations established pursuant to the **Export Administration Regulations (EAR) 15 CFR § 762**, **15 CFR § 764.5**, **OFAC 31 CFR § 501.601 (10-Year Mandatory Recordkeeping)**, and **OFAC 31 CFR Part 505 (Unified Sanctions Penalties Regulations)**. The undersigned system certifies under penalty of perjury (28 U.S.C. § 1746) that this investigation was executed in good faith prior to purchase order fulfillment. Under the *General Factors Affecting Administrative Actions (31 CFR Part 501, App. A)* and BIS Settlement Guidelines (15 CFR Part 766 Supp. No. 1), this cryptographic proof constitutes prima facie evidence of reasonable due diligence—mitigating strict-liability exposure up to **$374,474 (BIS ECRA)** or **$377,700 (OFAC IEEPA)** per violation (or 2x transaction value).

Note: The Merkle root anchored above binds this exact screening result to an immutable append-only cryptographic ledger. Any post-facto modification or DBA record mutation results in an immediate Merkle inclusion failure upon mathematical verification.

SECTION 2: BENEFICIAL OWNERSHIP & 50% RULE CASCADE PROOF

OFAC FAQ 401 (31 CFR PART 505) • BIS AFFILIATES RULE (JAN 10, 2027) • DOJ 28 CFR PART 202

STATUTORY FRAMEWORK (OFAC 50% RULE, BIS AFFILIATES RULE & DOJ 28 CFR PART 202): Property and interests in property of entities directly or indirectly owned 50 percent or more in the aggregate by one or more blocked persons (OFAC SDN) or restricted export parties (BIS Entity List / MEU under the BIS Affiliates Rule effective Jan 10, 2027, applying the 'Most-Restrictive Owner' standard) are restricted by operation of law. Additionally, DOJ Data Security Program regulations (28 CFR Part 202) prohibit bulk sensitive personal data transfers to entities 50%+ owned by Countries of Concern and mandate reporting at 25%+ for cloud services. NexTrace Global resolves corporate holding trees deterministically using NetworkX transitive graph math.

CONTRIBUTING SPECIALLY DESIGNATED NATIONALS (SDNs):

ZERO CONTRIBUTING SDNs: No corporate graph nodes or beneficial owners holding equity in the target entity match active OFAC, BIS, EU, or UK sanctions designations.

RESOLVED CORPORATE OWNERSHIP HIERARCHY (TRACE PATHS):

Target operates as a direct unencumbered entity. No secondary holding tiers or offshore holding conduits discovered in corporate registries.

MATHEMATICAL DETERMINATION: Aggregate blocked equity evaluated at **0.00%**. **SAFE HARBOR AFFIRMED:** Aggregate blocked equity remains strictly below the 50.0% statutory threshold. Entity is cleared for commercial transactions subject to end-user checks.

SECTION 3: MULTILATERAL REGULATORY WATCHLIST AUDIT

DETERMINISTIC VERIFICATION ACROSS SIX GLOBAL REGULATORY AUTHORITIES

MULTILATERAL SCREENING PROTOCOL: NexTrace Global executes normalized NFKD deterministic matching against primary designating authorities simultaneously. Zero fuzzy LLM hallucinations are permitted. Match scores are derived deterministically using Levenshtein distance and Jaro-Winkler token metrics.

Regulatory List	Supervising Authority	Statutory Reference	Match Score	Determination
OFAC SDN & Non-SDN Menu	U.S. Treasury OFAC	31 CFR § 501 / 31 CFR § 510	0.00	CLEARED
